

NOTATION AS TOOL FOR THOUGHT

GOING
META
in SCS

• SEM - prime example

Bollen \S 2.3.3

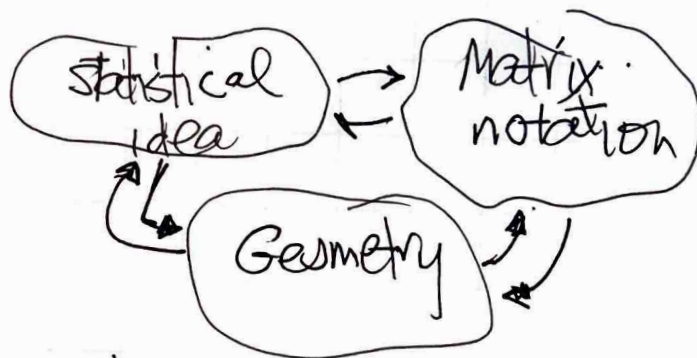

* How does it help you think about a model?

* What's missing

Unified diagrams?
Data analysis

• DAGs : causal inference

• Matrix algebra

• Data processing

`plyr`
`dplyr`

split/apply/combine
Nouns, Verbs

• Graphics

base R: `plot()`, `points()`, `lines` → now

GOG : `ggplot` → `ggplot2`

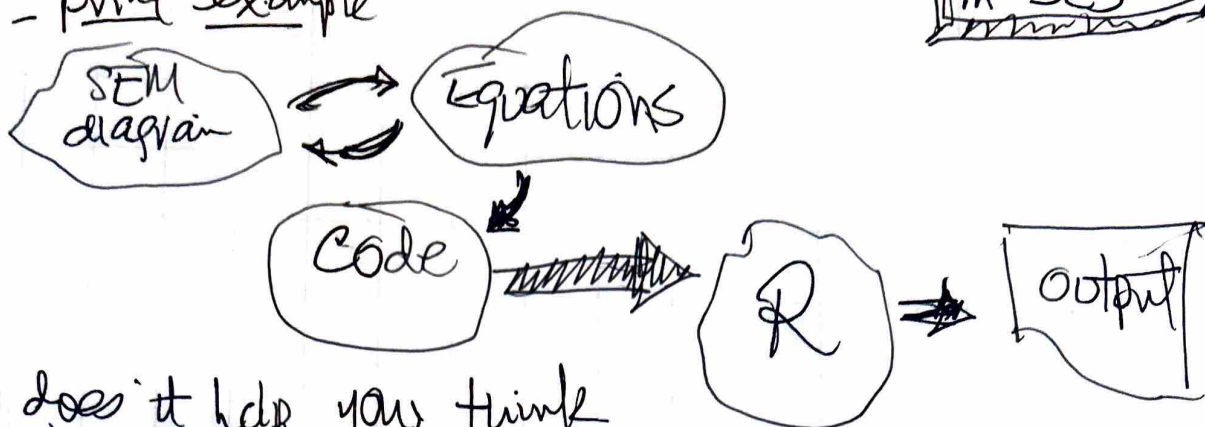

`tinyplot`

: re-imagined in `tidyplot`
